-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Art Unit: 3744

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-4, 7, 8, and 26-28 are rejected under 35 U.S.C. 103(a) as being unpatentable over Motoyama et al in view of Jaster. Motoyama et al, especially in Fig. 4, discloses the claimed invention except for the recited order of the expanding units and the evaporators. Jaster teaches a refrigeration system having several expanding units 17, 19, 11, each of which is followed by an evaporator 18, 20, 12. It would be obvious to modify Motoyama et al so that the first evaporator 10 follows right after the first expanding unit 16, in view of Jaster, for the purpose of generating more cooling from the evaporator 10.

3. Claims 5, 6, and 9-25 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

4. Applicant's election with traverse of the restriction requirement in the reply filed on July 13, 2004 is acknowledged. The traversal is on the ground(s) that the various groups of claims are all closely related enough so that they can all be examined together. This is not found persuasive because the various groups still contain enough different details such that a proper examination of all of the groups would entail a significant amount of time.

The requirement is still deemed proper and is therefore made FINAL.

Art Unit: 3744

5. Claims 29-35 are withdrawn from further consideration pursuant to 37 CFR

1.142(b), as being drawn to a nonelected invention, there being no allowable generic or linking claim. Applicant timely traversed the restriction (election) requirement in the reply filed on July 13, 2004.

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to William E. Tapolcai whose telephone number is (703) 308-2640. The examiner can normally be reached on Mon. - Thurs., 6:30 to 5.
